

This Tab Group contains the **THREE YEARLY** data collection spreadsheets. They are listed in order of creation (begin with Crop List each year)

The final spreadsheet, **Master Harvest Log**, is a continuous spreadsheet that **gets added to each year** but is **not recreated**. At the beginning of each year, the Harvest Log + Seeding Record data will be imported into individual tabs on the master spreadsheet that will update whenever the parent sheets are updated throughout the year. This creates a single-source dynamic spreadsheet!
